

Environmental Policy

Roadline Contracting Pty Ltd Specialises in Civil Infrastructure Works, Plant Hire, Traffic Control and Heavy Haulage in Western Australia

Roadline are committed to minimising the environmental impact of our business processes and operations.

Our objective is to create a culture and awareness of the environment which ensures that we identify and mitigate risks to the natural environment, community and heritage. This will be achieved through the provision of sound leadership, adequate resources, planned processes, education, training and a demonstrated commitment to this policy.

We demonstrate leadership and fulfil our environmental responsibilities by:

- Promoting a culture in which all employees have this shared commitment;
- Complying with our obligations with focus on environmental law and customer requirements;
- Maximising the recycling of materials and disposing of waste through safe and responsible methods;
- Reducing emissions from our work operations wherever possible, to reduce the impact of pollutants;
- Encouraging all of our subcontractors and business partners to comply with this policy;
- Regularly reviewing our Environmental Management System to ensure we achieve our environmental objectives, targets and continual improvement;

All our employees have a responsibility to take reasonable care for the environment and to adopt remedial action where environmental risks are identified or sustainability may be compromised.

In this way we will ensure the continuation of our business through sustainability considerations.
